

US Route 1 and Dumfries Road Quadrant Roadway

New traffic pattern to begin on or about May 5, 2026

Improvements are coming soon to the intersection of US Route 1 and Route 234

To reduce congestion and improve safety, a new loop road will open in the coming weeks.

The loop will replace left turns at the intersection to increase throughput and reduce delays.

- Traveling from Route 234 to points north? Continue through the traffic signal at Route 1, go around the loop, and turn right on Route 1.
- Traveling from Town of Dumfries to I-95 or points west? Move to the right lane prior to the intersection, continue through and exit to the loop road, then continue across Route 1 at the signal towards I-95.
- No more waiting to turn left!
- You can still turn right from either road.
- Please follow the signs and message boards to guide you.
